# XSS

---

- Cross-Site Scripting
- Formatação de texto
- Input de usuário não tratado
- Templating

<https://xss-game.appspot.com/level1>

# XXE

---

- XML eXternal Entity
- An XML External Entity attack is a type of attack against an application that parses XML input. This attack occurs when XML input containing a reference to an external entity is processed by a weakly configured XML parser.

# CSRF

---

- Cross-site request forgery
- Cross-Site Request Forgery (CSRF) is an attack that forces an end user to execute unwanted actions on a web application in which they're currently authenticated.
